

MARSHALLS ENERGY COMPANY Inc.

VACANCY ANNOUNCEMENT

Opening Date: May 1st 2008. Closing Date: Until position is filled.

Position.

Water / Sewer Engineer

Salary.

US\$ package dependent upon Qualifications and Experience

Location.

Majuro Atoll, Republic of the Marshall Islands.

Company info.

Marshalls Energy Company Inc.(MEC).

MEC is a unique utility company with an annual turnover of US\$50+million, headquartered on Majuro Atoll. The corporation controls six power plants located on 5 different islands and oversees the operation of the various water and sewer operations located on several islands. The company has a combined collected storage capacity of 36 million gals and operates various R/O units to 200,000 gpd capacity with distributed fresh and saltwater systems. Collected and septic sewer systems are operated with minor treatment systems and outfalls. All are in need of engineering design and repair.

Duties and Responsibilities.

- Under the general direction of the General Manager of MEC, the Water Engineer will assist and oversee the charge and control of the operation and maintenance of all water and sewer operations of the combined utilities. Primarily responsibility will be to upgrade the existing systems which have started to fail. These duties will entail some local travel to the various islands within the country.
- Implement policies, rules, and regulations of the corporation
- Develop and implement necessary training programs for local staff
- Maintain, control and further develop maintenance procedures for all operations in association with electrical, mechanical and operation staff.
- Perform other duties or projects as required or as assigned by management.

Qualifications.

A Minimum of 10 yrs experience in similar industry work is essential and with experience in isolated locations is preferable. A qualification in Water Engineering or any combination of equivalent experience deemed appropriate by management is required. A knowledge of R/O systems operation and maintenance, systems materials and standards, fluid dynamics and control systems is of a priority. A desire to work alone with minimal assistance under stressful situations is a bonus.
